

wedi Total Bathroom & Shower Waterproofing Solutions
For Preparing & Protecting Substrates In Tileable Wet Areas

Product Line Overview

1. wedi Corporation is an environmentally conscious, ISO 9001 certified manufacturer of 100% internally waterproof, mold-resistant, rigid extruded polystyrene foam (XPS) building panels, shower pan systems and accessory products.
2. wedi board is ultra-lightweight, thermally insulating, impermeable to water, quick and simple to install. It is available in several sizes/thicknesses (2 ft. x 4 ft. x 1/8" , 3 ft. x 5 ft. x 1/4", 3 ft. x 5 ft. x 1/2", 3 ft. x 8 ft. x 1/2" XL, 4 ft. x 8 ft. x 1/2" XXL and 2 ft. x 8 ft. x 2" being the most popular).
3. wedi building panels are commonly used in the following applications:
 - Interior walls in wet areas such as shower enclosures and steam rooms.
 - Tub surrounds and backsplashes.
 - Wood and concrete subfloor installations.
 - Custom designed seats/benches and shelves.
 - Beneath underfloor electric heating systems.
4. wedi pre-sloped ready to tile shower pans offer a one-step alternative waterproofing system to traditional methods thus dramatically reducing installation time.
5. Most wedi shower pans can easily be cut to size or extended using pre-sloped extension panels to fit custom showers and accommodate offset drain locations. They are available in 30 standard sizes including point drain, integrated linear drain and barrier-free styles.
6. Standard wedi accessories include pre-sloped curbs, ADA compliant sloped shower ramps, recessed niche, suspended corner seats and benches.
7. wedi building panels and shower pan systems are independently tested and approved by ICC Evaluation Service. In addition, they meet stringent International Plumbing Code (IPC), International Building Code (IBC) and National Plumbing Code of Canada standards.

8. All wedi products are backed by an industry leading, comprehensive 10 year or 15/20 year PRO certified warranty.

Benefits

For Remodeling Contractors:

- Extremely lightweight products which are easy to transport and handle.
- Simple onsite modification with a straightedge and utility knife increases productivity.
- Labor hours are significantly reduced since there is no traditional shower pan installation method curing time.
- Built-in waterproofing eliminates callback issues.
- Recommended for walls and ceilings but also rated heavy duty commercial when used on floors.
- Cement-resin coating with fiberglass mesh provides an excellent bonding surface for ceramic tile and dimensional stone.

For Builders:

- 100% waterproof and will not allow for mold growth thus eliminating potentially costly repairs.
- Expedites timely construction schedules and offers substantial labor savings due to completion of a ready to tile shower in 2-3 hours.
- Easily cut to size onsite; causes little or no dust/debris when installed and is non-hazardous.
- Market leader with a proven track record offering trusted total bathroom and shower waterproofing solutions for over 3 decades.

For Architects/Designers:

- Single source manufacturer for entire shower system.
- Simple specifications due to minimal components and basic installation methods.
- Extensive range of products provides unlimited design flexibility.
- Manufactured from ozone friendly extrusion promoters; thermal insulating properties support energy conservation.
